

# TEAM CLUE VIRTUAL EDITION

Put your detective skills to good use! Similar to the game Clue, Teams will work together and collaborate to find out what happened to the Senior Executive and why he/she mysteriously disappeared. Our Chief of Security will guide you through this fun, engaging and fully customized activity.

### SCENARIO:

Oh No! Senior Executive has disappeared, and we need your help to find him/her. Chief of Security has some helpful information that may help locate your Senior Executive. Only through collaboration and communication will you and your team be able to successfully assist with the investigation. Essential information / clues will be provided by your Chief of Security that will implicate "suspects" within your group (based on company information). A crucial guest will make an appearance and the interrogation of 4-5 "suspects" begins. The group will then be separated and put into Team breakout rooms for the preliminary evaluations.

They will work together to complete a team worksheet by discussing, comparing clues, suspects and information that was presented earlier. Teams are brought back into main room and now our gifted Psychic Adviser joins the meeting revealing information about other possible "suspects".

Once all information is shared with the group the Teams are then placed back into Team breakout rooms for the final summation to deliberate and decide who did it and what their motive was. After Teams deliberate, and are back in the main room, Captains reveal their predicted verdicts. Chief of Security shares "new" information and announces who the perpetrator is and their motive.

**Senior Executive is found!**

Designed to ignite your employee's imagination, using critical thinking skills as they work together to solve the mystery!
